Dear Colleague:

Teaching provides us with many joys as well as challenges. This has been especially true during our work as educators in these unprecedented times. Like educators all around the country, I have faced these challenges on a daily basis with my own Second Grade class. I have also talked with many Second Grade teachers who are concerned about meeting the needs of all their students, especially those who are struggling or who have gaps in their learning.

I have designed this seminar to provide you with cutting-edge ideas, strategies, activities, and tools you can use to enhance your Second Grade program! During this fast-paced, action-packed day, you will learn Second Grade-tested techniques for implementing innovative teaching practices across the curriculum. We will explore successful strategies to help you work smarter, not harder, using the latest, best instructional practices for Second Grade. You can immediately implement these strategies and ideas into your own program, confident they will work. This is because every activity, idea, strategy, and lesson I share has been classroom-proven and tested with my own Second Grade students.

Along with the comprehensive Second Grade resource handbook you will receive, I will share many samples of actual Second Grade work. My goal is to give you the most practical, successful methods to apply and adapt the very best, cutting-edge teaching techniques to help you meet the needs of all your Second Grade students.

Be prepared to step into your students' shoes as I demonstrate these exciting and engaging techniques that you can take and use immediately. I look forward to sharing a wealth of ideas and teaching strategies with you that will energize you and significantly boost the achievement of your Second Graders.

Sincerely,

Amy Stark
