Learn dozens of highly effective strategies for helping students with special needs to make significant academic gains. Explore ways to break down barriers that short circuit learning for students with disabilities. Identify essential ways to optimize your instruction to better meet students' needs and help them make more rapid progress, and much, much more! **You won't want to miss this hands-on, engaging opportunity to learn dozens of practical ideas and strategies that you can use immediately to rapidly improve the skills of your students with special needs.**

# A Message From Seminar Leader, Nicole Eredics

## Uniquely Qualified Instructor

**NICOLE EREDICS** is an experienced educator, teacher trainer, and author who is passionate about creating accessible and achievable learning experiences for students with special needs. She brings years of experience as a full inclusion teacher and loves sharing highly practical strategies for improving academic outcomes of students with disabilities. Nicole is a best-selling author of a resource book for special educators called, *Inclusion in Action: Practical Strategies to Modify Your Curriculum* (Brookes Publishing, 2018). As a National Board Certified Inclusion Specialist, Nicole regularly speaks and consults on the topic of improving outcomes of diverse learners with educators across the country. Nicole is also the author of, *Rapidly Improving the Skills of Your Students with Special Needs (Grades 1-12)*, the extensive digital resource handbook you will receive at the seminar. **You'll leave Nicole's seminar with a wealth of valuable strategies, techniques, and resources to help you increase the learning of your students with special needs.**

Dear Colleague:

In the face of growing skills gaps, our instinct as teachers is often to re-teach lost skills. But we now know that using this approach can cause our students with special needs to lose even more academic ground. The more time is spent relearning old skills, the less time is spent learning new concepts. With this approach, our students with special needs fall further and further behind their peers.

Research now tells us that there is a better solution to this challenging issue – helping our students make more rapid progress, not remediating!

I have designed this seminar specifically to equip you with the skills, strategies, and resources to rapidly improve the educational outcomes of your students with special needs. In our day together, you will learn how to create a classroom environment where students with special needs quickly make academic gains through engaging and meaningful lessons from grade-appropriate curriculum. I want to provide you with a wealth of ideas that will help you make a real difference in your students' outcomes at school and beyond!

I invite you to join me for this fast-paced, resource-rich, and strategy-packed seminar. I am excited to share highly effective and practical ideas based on my unique experiences as a special education teacher, teacher trainer, and author. I can't wait to share dozens of practical ideas and strategies you can use right away to rapidly improve the learning of your students with special needs!

I look forward to meeting you at the seminar!

Sincerely,

A handwritten signature in purple ink that reads "Nicole Eredics".
